PROFESSIONAL SUMMARY

Full-Stack Java Developer with 2+ years of experience designing, developing, and delivering secure, scalable, enterprise-grade software solutions using Java, Spring Boot, React.js, Microservices, PostgreSQL, Kafka, and AWS. Experienced in building and maintaining fault-tolerant backend services, enterprise-grade APIs, cross-platform integrations, and cloud-native applications. Strong knowledge of Object-Oriented Programming, Service Oriented Architectures, distributed systems, REST, JSON, XML, Agile development, and secure application development. Proven ability to collaborate across business and engineering teams, resolve complex technical issues, conduct code reviews, mentor team members, and deliver innovative technology solutions in fast-paced environments.

PROFESSIONAL EXPERIENCE

- **Full Stack Java Developer , Numetry Technologies Pvt. Ltd** *(Aug 2023 – Jul 2024)*
 - o Designed, developed, and delivered secure, scalable, enterprise-grade software solutions using **Java, Spring Boot, React.js**, and **Microservices Architecture**, supporting high-performance business applications.
 - o Built and maintained fault-tolerant backend services and enterprise-grade **APIs** using **Java, Spring Boot, REST, JSON**, and **PostgreSQL** while following software development best practices and design patterns.
 - o Partnered across business and engineering teams to deliver innovative technology solutions, perform **cross-platform integrations**, resolve complex **technical issues**, and improve overall **system reliability**.
 - o Designed and developed **scalable solutions** using **cloud-native architectures** and **microservices** in **distributed computing environments**.
 - o Monitored application performance, **diagnosed production issues**, and implemented fixes to improve **system reliability** and maintain high service availability.
 - o Demonstrated operational excellence by improving **application reliability, maintainability**, and **deployment** efficiency through continuous performance optimization and adherence to engineering best practices.
 - o Conducted **code reviews**, enforced **coding standards**, mentored **team members**, and contributed to engineering excellence within **Agile development teams**.
- **AI/ML Developer | Freelance** *(Aug 2024 - Dec 2024)*
 - o Independently architected and delivered production-ready AI systems in **Python** — real-time driver distraction detection, human scream-based crime prevention, and crop recommendation — using **TensorFlow, OpenCV**, and **scikit-learn**; sole engineer from architecture through deployment.
 - o Designed scalable **ML pipelines** and intelligent **APIs** for agriculture, safety, and surveillance domains — demonstrating ability to build AI systems from the ground up with no established infrastructure.
- **Graduate Teaching Assistant | Texas A&M University-Kingsville** *(Jan 2025 - May 2025)*
 - o Mentored 30+ students in **Java, C++**, and **MySQL**, reinforcing strong **communication skills** and the ability to collaborate with team members effectively — directly applicable to leading development teams
 - o Designed and reviewed Java lab assignments covering OOP principles, Spring-based backend patterns, and **RESTful API** design — demonstrating a solid understanding of software development best practices and design patterns.
- **Thesis Researcher | Texas A&M University-Kingsville** *(Jun 2025 - May 2026)*
 - o Designed, developed, and implemented a high-quality, scalable 2D-to-3D Virtual Try-On framework using **deep learning** techniques, enabling realistic garment fitting and visualization from a single RGB image.
 - o Applied strong **problem-solving** skills to build and evaluate an efficient **computer vision** pipeline, leveraging technology advancements to improve **3D reconstruction** accuracy and overall solution quality.
- **Student Tutor — CS & Algorithms | Texas A&M University-Kingsville** *(Oct 2025 - May 2026)*
 - o Provided technical guidance to 20+ students on **algorithms, data structures**, and software development concepts, strengthening **communication** skills and **problem-solving** skills.
 - o Collaborated with students to troubleshoot and resolve 50+ technical issues per semester, helping them understand **project requirements** and development best practices.

- o Mentored students in data structure implementation, algorithm development, recursion, dynamic programming, graph algorithms, and object-oriented programming concepts.

INTERNSHIP EXPERIENCE

- **Full Stack Java Developer Intern , Numetry Technologies Pvt. Ltd.** *(Jan 2023 -Jul 2023)*
 - o Contributed to 5+ **Java/Spring Boot** and **React/Angular** full-stack applications; implemented 20+ user-facing features with **RESTful API** integration — reducing bug rate 30% and improving team
 - o Participated in Agile development environments practicing CI/CD principles, code reviews, technical documentation.
 - o Utilized Git-based version control workflows for collaborative software development and code integration.

PERSONAL PROJECTS

- **Dynamic Fee Processor (Financial Services Platform)** | Java, Spring Boot, React.js, Kafka, Redis, PostgreSQL, AWS
 - o Built and maintained resilient distributed systems that are scalable, fault-tolerant, and cost-effective using Java, Spring Boot, PostgreSQL, REST, JSON, and AWS.
 - o Implemented cross-platform integrations with third-party systems through REST APIs and SQL databases, improving operational efficiency and application scalability.
 - o Deployed cloud-native applications on AWS EC2 and Docker environments while contributing to technical documentation, testing, and continuous software quality improvements.
- **Multi-Agent Research & Automation System** | Python, Kafka, Redis, ChromaDB, RAG, LLMs
 - o Designed and developed distributed systems for automated document ingestion, analysis, and report generation using event-driven architectures and scalable processing workflows.
 - o Integrated Kafka for asynchronous communication and Redis for low-latency caching, improving performance, reliability, and scalability across multiple services.
 - o Applied system design principles, problem-solving skills, and technical documentation practices to deliver maintainable and high-quality solutions.
- **3D Virtual Try-On (M.S. Thesis Research)** | PyTorch, OpenCV, OpenPose, SCHP, U²-Net, Structured Latent Representation (SLat), Flow Matching Transformers
 - o Designed and developed an end-to-end **2D-to-3D Virtual Try-On system** that enables users to visualize garments on a digital avatar from a single RGB image, improving realistic clothing fitting and visualization. Built using **PyTorch, OpenCV, OpenPose, SCHP, and U²-Net** for human parsing, pose estimation, and garment reconstruction.
 - o Implemented a scalable deep learning pipeline for **3D garment reconstruction and rendering** using **Structured Latent Representation (SLat)** and **Flow Matching Transformers**

KEY SKILLS

- **Languages :** C, C++, Python, c#, Java
- **Frontend:** React.js, Angular, JavaScript
- **Backend & Architecture:** Java, Node.js, JSON, Spring Boot, Microservices, REST APIs, Service Oriented Architectures, Cloud-native Architectures, Distributed Systems, Distributed Computing Environment, Fault-tolerant Backend Services, Cross-platform Integration, PHP, Secure Application Development
- **Databases, Caching:** MySQL, PostgreSQL, Redis.
- **Cloud & DevOps:** AWS (EC2), Docker, Kubernetes, OpenShift, Jenkins, GitHub Actions, Maven.
- **Testing & Tools:** JUnit, Mockito, REST Assured, Git, Jira.
- **Core Concepts:** Object Oriented Programming, Service Oriented Architectures, Agile, Object-Oriented Design Principles, Data Structures, System Design, Code Review, Technical Documentation, Problem-solving, AI/LLM Integration.

EDUCATION

- **M.S. in Computer Science** (GPA: 4.0/4.0) Texas A&M University-Kingsville, TX
- **B.Tech. in Computer Science** (GPA: 3.89/4.0) Vignan's Lara Institute of Technology & Sciences, India

CERTIFICATIONS

- AWS Certified Cloud Practitioner — AWS
- Spring Boot Certification — Telusko
- React.js Certification — Udemy
- Java Certification — Wipro TalentNext
- Full Stack Web Development with MERN Stack & GenAI 2026 Certification — Udemy
- JavaScript Certification — Infosys
